Improving cardiovascular health remains a priority even during a pandemic.

Million Hearts® releases its new Hypertension Control Change Package (HCCP). The 2020 HCCP provides new tools and resources for implementing cardiovascular quality improvement campaigns. The HCCP highlights the work of the 202 Hypertension Control Champions and fosters new self-care focused blood pressure management and adherence—empowering chronic kidney disease patients to improve their health outcomes. The new HCCP provides new tools and resources for implementing cardiovascular quality improvement campaigns.

Validator BP is a new resource listing home blood pressure devices that have been independently validated for clinical accuracy. The Community Guide reviews effective telehealth interventions for chronic disease management, focusing on Million Hearts® priority areas.
